# Bug Screen Doors

**Setting the Standard for Bug Screen Doors at your Dock.**

Keep bugs, birds, and intruders out while allowing fresh air flow in.

**Contact us: Toll Free: 1-888-766-8328 sales@shaverinc.com**

# Increase profitability & convenience at your facility.

Bug screen doors are designed to provide your facility with the convenience of natural air flow and light, while preventing bugs and pests from entering your facility. While most solutions on the market are simply cheap versions of other door designs, cutting corners on quality and longevity.
**Our doors are the better engineered, longer lasting solution for your low to medium traffic doors.**

## The better bug screen solution:

### Protect your facility from bugs, birds, and intruders.

Allow natural airflow without the unwanted visitors - bug screen doors feature upper, side, and floor seals to ensure a complete barrier solution, helping improve productivity & morale in your facility.

### Improve comfort & reduce energy costs... all year round.

Shaver's easy-to-replace door panel system lets you swap out panels as seasons change to maximize your potential savings. Mesh panels can provide a 65% shade factor, while still allowing natural air flow to improve employee comfort. In colder months, you can easily swap out panels for solid vinyl to save on heating costs, while preventing your building contents from excessive wind entry.

### Built to withstand your daily warehouse activity.

All doors come standard with heavy duty pultruded fiberglass wind bars and corrosion-proof PVC tracks. Designed to minimize moving parts, and featuring easy-to-replace parts, our bug screen can keep you up and running, maximizing productivity potential for your warehouse.

## Easily interchange or repair panels:

Whether you damage a panel in your bug screen door, or want to swap to solid panels for the winter months, Shaver has you covered. We designed our panels to be easy-to-replace and affordable. Whether providing additional panels with your order, or shipping replacements within a couple of business days, we designed our doors to maximize your time spent up and running.

# Installation is easy as 1-2-3!

### Always Pre-Assembled

Forget the other guy's bag of loose parts. We pre-assemble every door's major components to ensure the highest quality standards, reducing install time.

### Easy Track Mounting

Easily secure your door tracks in-jamb or face mounted using our pre-drilled holes, or mount around your existing door with our projection mount brackets.

### Pest-Proofing Included

Our projection-mounted door tracks come with pre-installed side seal panels properly sized to make installation and pest-proofing a breeze!

### Optional Plug and Play

Simplify installation and electrical work with our plug and play pre-wired option! Simply mount the switchbox and plug into an outlet, and you're good to go!

## ACTIVATION METHODS

### Powered In-Tube Motor

Our In-Tube Motors operate at 12"/second or 6"/second.

### Chain Hoist

Features an integrated brake and 4:1 gearbox ratio.

### Hand Crank with Drill Assist

Manual hand crank with optional drill attachment.

### Manual Spring System

Manually lower door and secure with attached pin.

Projection mounted 10' x 10' powered door pictured with blue mesh.

# Powered Bug Screen Doors

Our Bug Screen Door offers a powered activation method with two different speed options. With a fully-contained in-tube motor, the powered Bug Screen is designed to put up with the harsh conditions of a loading dock, allowing fresh air in and keeping the bugs out, all at the flip of a switch.

- **Every door ships partially pre- assembled to ensure high quality standards and reduce install time.**
- **Available door speed of 12"/sec or 6"/sec .**
- **Provides a seal at the loading dock to keep bugs & pests out of your facility.**

Reflective Photo Eye safety sensors are available as an option for any powered door to stop the door from closing, maximizing safety.

Comes standard with a Toggle Switch, but has the option to be controlled with a remote, pull cord or NEMA1 controller.

Ability to operate your concealed in-tube motor at speeds of 6"/second or 12"/second depending on your speed preference.
