FABRIC WAY COVERS

PRODUCT INFORMATION

Shaver Industries uses Advanced Thermic Bonding instead of stitching for our Fabric Way Covers. The advantage of this method is it prevents wear & tear while increasing longevity of the product. Fabric Way Covers offer maximum protection for your CNC machine tools while increasing machine performance. Shaver Industries way covers are custom made to almost any situation. Our materials withstand temperatures from – 40 C to 1000 C, can be self-extinguishing as well as oil, coolant and chemical resistant. We have expertise in high speed cutting technology, chip protection, laser beam protection, aggressive grinding coolants and moving-column machines.

FEATURES

- Maximum flexibility & compression
- Cover multiple sides on a machine
- Machine component protection
- Custom designs available

KEY BENEFITS

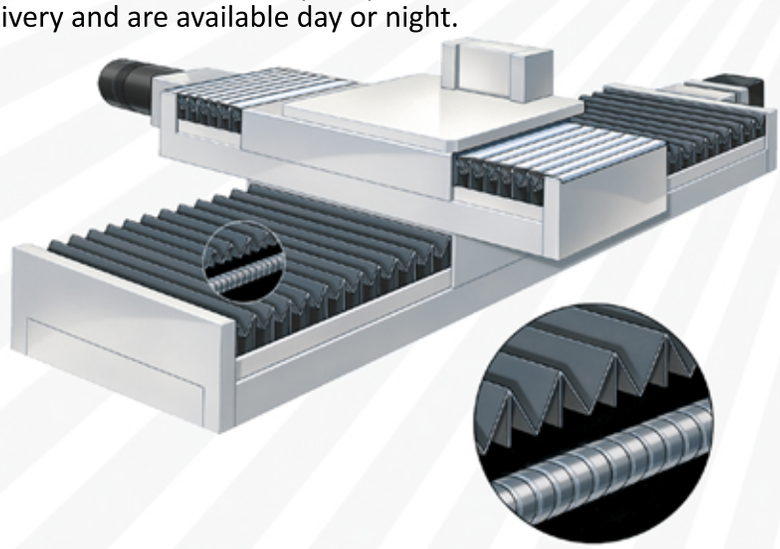
- ☑ Adds reinforced strength and increased rigidity.
- ☑ More aesthetically pleasing appearance compared to sewn.
- ☑ Maximum protection and flexibility in a wide range of environments.
- ☑ High temperature resistance.

APPLICATIONS

- Machine guideways
- Linear guide protection
- Screen or aesthetic barrier

INSTALLATION

Our highly qualified service technicians are available to install and service technicians are available to install and service our products to maximize the return on your investment. To reduce your downtime, we have spare parts in stock for immediate delivery and are available day or night.



INNOVATION. PRECISION. RELIABILITY.
