

# **ROLLTECT™**

## CASE STUDY

# RETRACTABLE WELD SCREEN

Retractable Weld Screen gives manufacturers increased safety and efficiency, with ease of use.

## OVERVIEW

Designed to make it safer, easier and more efficient for welders to do their work, the RollTect™ Retractable Weld Screen provides space-saving and convenience features.

THE NEW ROLLTECT™ RETRACTABLE WELD SCREEN GIVES MANUFACTURERS THE SAME RELIABLE SHAYER INDUSTRIES PROTECTION AGAINST WELDING SPARKS, ULTRAVIOLET LIGHT AND FLYING DEBRIS WITH A LOT MORE CONVENIENCE, EASE OF USE AND A CLEAR LOOK.

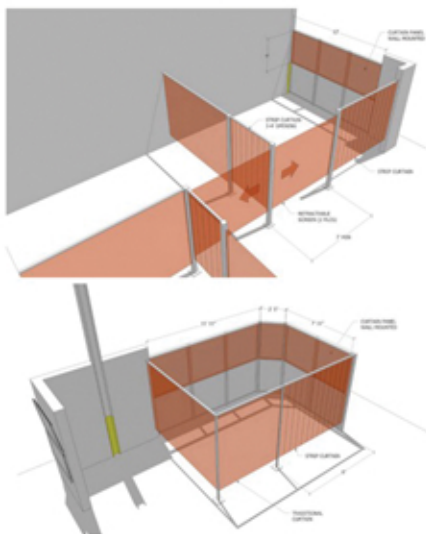

### ROLLTECT™ RETRACTABLE WELD SCREEN MOUNTS QUICKLY TO ANY VERTICAL SURFACE

When it is no longer needed, or you are moving material in or out of the work area, unlatch the Screen and walk the RollTect™ Retractable Weld Screen back to its roller base.

### RETRACTS UP TO 20 FEET

RollTect™ Retractable Weld Screen can easily extend up to 20ft; simply walk the guard from side-to-side of the work cell and hook it onto J-hooks.

### RAPID ACCESS TO WELD AREA

The RollTect™ screen is easy to move with no heavy hauling or maneuvering needed:

- Overhead cranes have a clear path into the work cell.
- The RollTect™ screen allows rapid access for forklifts into the work cell.

### MAXIMIZES WORKSPACE

The RollTect™ Retractable Weld Screen ensures an optimal weld area that can be customized quickly:

- Plant managers are pleased with the space-saving benefits of the RollTect™ weld screen
- Unlimited configuration for your weld cells using mobile/fixed base and versatile mounting options
